

Aleksandra Sagaidak is a PhD student at the St. Petersburg State Institute of Technology. Since 2020, she is a Junior Researcher at the Laboratory of Molecular Pharmacology. Her research area lies in the search for small molecule compounds capable of modulating the activity of signaling cascades for the treatment of complex diseases. It includes overcoming ABC-transporter-mediated multidrug resistance of cells and AMPK-associated metabolic disorders. She is the winner of research competitions and the holder of diplomas. In 2022-2023, she was awarded the scholarship of the President of the Russian Federation for achievements in academic and scientific activities.
